

# DiriGoStream

*The New Generation of Renewable Water*

This renewable technology will eliminate the need for toxic disinfectants like chlorine bleach and expensive fossil fuels.

## **DiriGoStream**

Free Chlorine Generator (FCG)

## **DiriGoClean**

Antiseptic Production Unit (APU)

## **DiriGoHydro**

Hydrogen Conversion System (HCU)

**With the ability to convert treated wastewater or seawater (with a turbidity of under 10 NTU) to hypochlorous acid and hydrogen gas, the location of the unit at any wastewater treatment facility, or near access to seawater, is ideal.**

**WITH MINIMAL NEED FOR  
STORAGE, HYDROGEN CAN BE  
PRODUCED WHEN AND WHERE  
IT IS NEEDED.**
